Good morning,

What advice do you have on how to handle questions coming from other agencies. This one is from the European Food Safety Agency. Answer or punt elsewhere?

Thanks,

Tina

Hi Tina I hope you are doing well.

Such a shame you did not attend the toxicology conference in Belgrade, it was interesting!

I am writing you to for a piece of information.

We came across this article in Reuters which I am sure you are fully aware of:
U.S. environment agency proposes limits to science used in rulemaking

<https://www.reuters.com/article/us-usa-epa-science/u-s-epa-set-to-unveil-policy-barring-secret-science-sources-idUSKBN1HV2DJ>

The article points out that scientists and media said that this proposal result in „excluding all data where confidential patient information cannot be revealed“ but are not patient data anyway always anonymized? Would this indeed have a huge impact on your work?

Let me know if I am right in asking this question to you or if shall I re-direct my question to a colleague of yours.

Regards,

Lucia
